

FRAMINGHAM HEART STUDY CODING MANUAL

Clinic Exam: Interview, Physical Exam, ECG

COHORT: Offspring, Omni 1

TIME INTERVAL: Offspring Exam 10/Omni 1 Exam 5 October 2019-June 2022

DATASET NAME: e_exam_ex10_1b_1409s

OBSERVATIONS: 1698

Variables that define a unique record: SHAREID.

Exams were paused March 13, 2020 due to the COVID-19 pandemic. Hybrid Exam began June 15, 2020 and consists of:

(1) Televisit portion completed remotely through zoom or telephone

(2) Onsite (Follow-up) portion completed onsite or offsite (began September 14, 2020).

Some participants requested to only complete the Televisit portion of the exam, and did not do any in-person follow-up. To determine exam type, see the site variable (K0002).

See e_exam_ex10_1b_1409_protocol2 for layout of exam components for different sites.

Menopause, cancer, CVD events (sequence of events, SOE), atrial fibrillation, fractures, medications and cardiovascular procedures are further adjudicated, reviewed or validated (through medical records and expert panel review). It is recommended that the further adjudicated, reviewed or validated datasets be used for data analysis rather than the initially collected variables within this dataset.

K0005 (date of birth) was deleted to preserve confidentiality.

Medical encounter details (regarding medical visits or hospitalizations) have been deleted to preserve confidentiality (for example, MD name, hospital name). All character variables were entered at the time of exam. Most character variables have been deleted to preserve confidentiality. In general, dates have been deleted with a few exceptions where only the year was retained (cases where no further adjudication is expected).

The following variables found in the clinic exam questionnaire have been excluded from this dataset.

They can be found in separate datasets:

K0001 (exam date) can be found in the most recent dates file (vr_dates_2022_a_1487)

K0224 – K0278 (Medications)

K1468 – K1586 (MMSE)

K1608 – K1622 (Gait Mat Walk Test)

K1623 – K1651 (eFHS Device Tracking)

K1653 – K1669 (Hearing Evaluation)

K1672 – K1686 (Octa Screening Test)

K1689 – K1704 (Tonometry Worksheet)

K1742 – K1893 (Bleeding Questionnaire)

K2017 – K2084 (Community Assessment of Pain and Sensitization in the Elderly)

K2085 – K2114 (PPT (Trapezius) & CPM (BP))

The following variables found in the clinic exam questionnaire have been excluded from this dataset. They are used for administrative purposes only
K1039 -K1059 Referral Tracking, page M20
K1069 – K1160 COVID Questionnaire, page T01A
K1961 – K2004 Exiting, page T16
K2006 – K2016 Televisit Exit Interview, page T17

See the accompanying annotated data collection form for additional information regarding variables. The data collection form has a hierarchical pattern with regard to some questions/variables. In order to gain a full understanding of the layout of the questionnaire and relationship between variables see document e_exam_ex10b_1b_1409_annotated_form (highly recommended).

Some pages of the questionnaire have a “form is intentionally left blank” variable which signifies an entire page was not filled in or left blank. If a coded value is selected, all values on that particular page are set to unknown.

The protocol and the annotated form documents corresponding to this dataset represents more data than is contained in this dataset.

Aspirin usage is collected in the aspirin questions (K0211-K0215) of this dataset. Aspirin is NOT included in the medications dataset.

The variables in the "Review of Health History Based on Examiner Interview" are not recommended for data analysis. Items are generally used to identify potential cases needing further review for determination. No specific criteria are associated with these items, rather clinical impression only.

Study data were collected and managed using REDCap electronic data capture tools hosted at the Framingham Heart Study. 1,2 REDCap (Research Electronic Data Capture) is a secure, web-based software platform designed to support data capture for research studies, providing 1) an intuitive interface for validated data capture; 2) audit trails for tracking data manipulation and export procedures; 3) automated export procedures for seamless data downloads to common statistical packages; and 4) procedures for data integration and interoperability with external sources.

The following variables found in the clinic exam questionnaire have been excluded from this dataset. If alcohol consumption was reported by month, this data was used to calculate the alcohol consumption by week, and then these variables were deleted from the dataset. The calculation used was: alcohol consumption by week = alcohol consumption by month / 4. K0322, K0326, K0330.

There were three physical activity questionnaires administered: Physical Activity Questionnaire (PAI), Physical Activity Scale for the Elderly (PASE), and Physical Activity Questionnaire (PAQ). The PAI and PAQ were administered through 12/09/2019 (n=120) and were replaced by the PASE activity questionnaire (n=1578). Participants whose exam date is after 12/09/2019 will have missing data for all PAI and PAQ questions.

This dataset is a modified version of the original dataset. Some observations were deleted due to consent restrictions. This coding manual is based on the original dataset. Therefore the value ranges, number of observations and/or cohorts found in the modified dataset, may differ from those stated in this manual.

IDTYPE

Variable name: IDTYPE

Description: Framingham Heart Study cohort identifier

Code or Value	Description	Count
1	Offspring Cohort	1501
7	Omni 1 Cohort	197
.	Unknown	0

Note: IDTYPE and ID taken together form the study participant's ID number.

ID

Variable name: ID

Description: Framingham Heart Study participant identifier within a cohort

Note: IDTYPE and ID taken together form the study participant's ID number.

ID deleted - use SHAREID

SHAREID

Variable name: SHAREID

Description: Unique study participant identification number

K0001

Variable name: K0001

Description: Date of Exam

Code or Value	Description	Count
10/2019 — 06/2022	Range of values	1698
.	Unknown	0

Note: Date includes month, day and year, however coding manual displays only month and year to preserve confidentiality.

K0001 has been deleted from the dataset. For a complete listing of all Framingham exam dates see the current exam dates dataset.

Description: Tech Portion Date: Date (Televisit)

Code or Value	Description	Count
06/2020 — 06/2022	Range of values	736
.	Unknown	962

Note: Exams were paused March 13, 2020 due to the COVID-19 pandemic. Hybrid Exam began June 15, 2020 and consists of:
(1) Televisit portion completed remotely through a computer or phone.
(2) Onsite (Follow-up) portion completed onsite (began September 14, 2020).
Some participants requested to only complete the Televisit portion of the exam, and did not do any in-person follow-up.

K1954 represents the date of remote televisit (if completed).

K1954 has been deleted from the dataset. Refer to variables DATE10 for Offspring and DATE5 for Omni 1 in dataset vr_dates_2022_a_1487 for the date televisit was completed. If an exam included a televisit portion, these variables represent the date that medical information was collected and the televisit was conducted.
